

How to Order

Order by phone, fax or e-mail.
T +44 (0)1909 476 539
F +44 (0)1909 472 772
E info@welbecktiles.com

You are welcome to come and visit our showroom, which is only open by prior appointment.

Samples

We are happy to supply up to three tile pieces free of charge. Whole tiles will be charged at the normal retail price.

Lead Time

All tiles are made to order, we will give you an advised lead time when you order, but recommend allowing up to three weeks for delivery.

Collections and Deliveries

Orders can be collected from our studio by prior arrangement, or sent with a next-day courier. We are happy to ship goods abroad, and the charges for deliveries outside of the mainland UK are available on request. The cost of delivery within the mainland UK is as follows:

- Up to 10 tiles : £7
- 10 – 200 tiles : £12
- 200+ tiles : £20

Payment

Full payment is required upon ordering. We accept cheques, and all major credit cards. All prices quoted include VAT.

Returns and Breakages

We pride ourselves on our excellent packaging, and thus breakages are very rare. All tile deliveries are fully insured. It is essential that you unpack and check your tiles on receiving them for insurance purposes, even if you do not intend to use them straight away. We regret that we cannot accept claims for breakages after 3 days. If anything is broken, we will endeavour to replace them as soon as possible.

As all tiles are made order, we regrettably cannot accept returns unless the product is faulty.

Terms and Conditions

All goods supplied by Welbeck Tiles Ltd. are supplied on the basis of the company's standard terms and conditions. Copies of which are available on our website, and/or by request.

Use

Welbeck Crackle tiles are suitable for walls in kitchens and bathrooms, and for fireplaces. We do not recommend they are used in power-showers.

Product Characteristics

Shade, glaze, and crackle variation will occur due to the inherent characteristics of handmade tiles made from natural clay. These are not considered defects, and we believe that it adds to the tiles' individuality.

Installation

Where possible, tiles should be laid out prior to fixing, or taken randomly from boxes to allow for blending of any shade variation.

Any standard wall tile adhesive can be used to fix our tiles. We recommend ivory or cream grouts.

Grout joints must be judged by eye as of the uneven edges, and made as tight as possible.

Crackle tile and grout joints should be sealed using a penetrating sealer. We recommend using KF StainStop by Lithofin, which we always have in stock and can be purchased with your order.

The Platinum Collection decors must be protected with a low-tack tape while fixing and grouting.

Care

We recommend cleaning with non-abrasive cleaning and a soft cloth.
